

HPC Status Page

The [HPC Status Page](#) provides a centralized and real-time view of the status of our HPC infrastructure and services.

It is the primary source of information regarding:

- Service incidents
- Ongoing disruptions
- Planned maintenance activities

Maintenance announcements will continue to be communicated through the usual channels (email and forum announcements), while the status page provides a consolidated view of all events affecting the platform.

Access

- Global status page: <https://status.hpc.unige.ch>
- Baobab status page: <https://status.hpc.unige.ch/baobab>
- Bamboo status page: <https://status.hpc.unige.ch/bamboo>
- Yggdrasil status page: <https://status.hpc.unige.ch/yggdrasil>

Forum Integration

Status badges are displayed in the forum header for each cluster. These badges are automatically updated and can be clicked to open the corresponding status page.

Status Indicators

Status	Description
Operational	Service is operating normally.
Maintenance	Planned maintenance is in progress.
Degraded Performance	Service is available but performance may be impacted.
Partial Outage	One or more service components are unavailable.
Major Outage	Service is unavailable.

Reporting Issues

If you experience an issue that is not reported on the status page, please contact the HPC support team through the usual support channels.
