

First you need to have and SSH key pair If you don't have ssh key pair you can follow the procedure to [create a new pair \(windows\)](#)

Connect to :

<https://cloud.unige.ch>

And login with you ISIS Account :

Username
huwilers

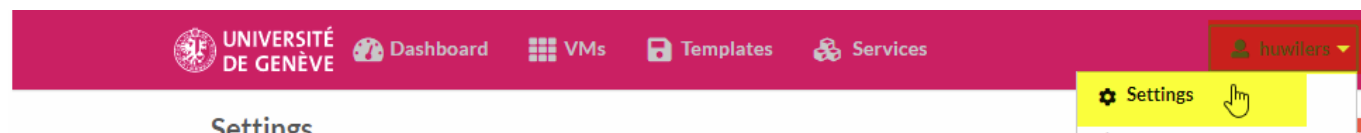

Password
.....

☐ Keep me logged in

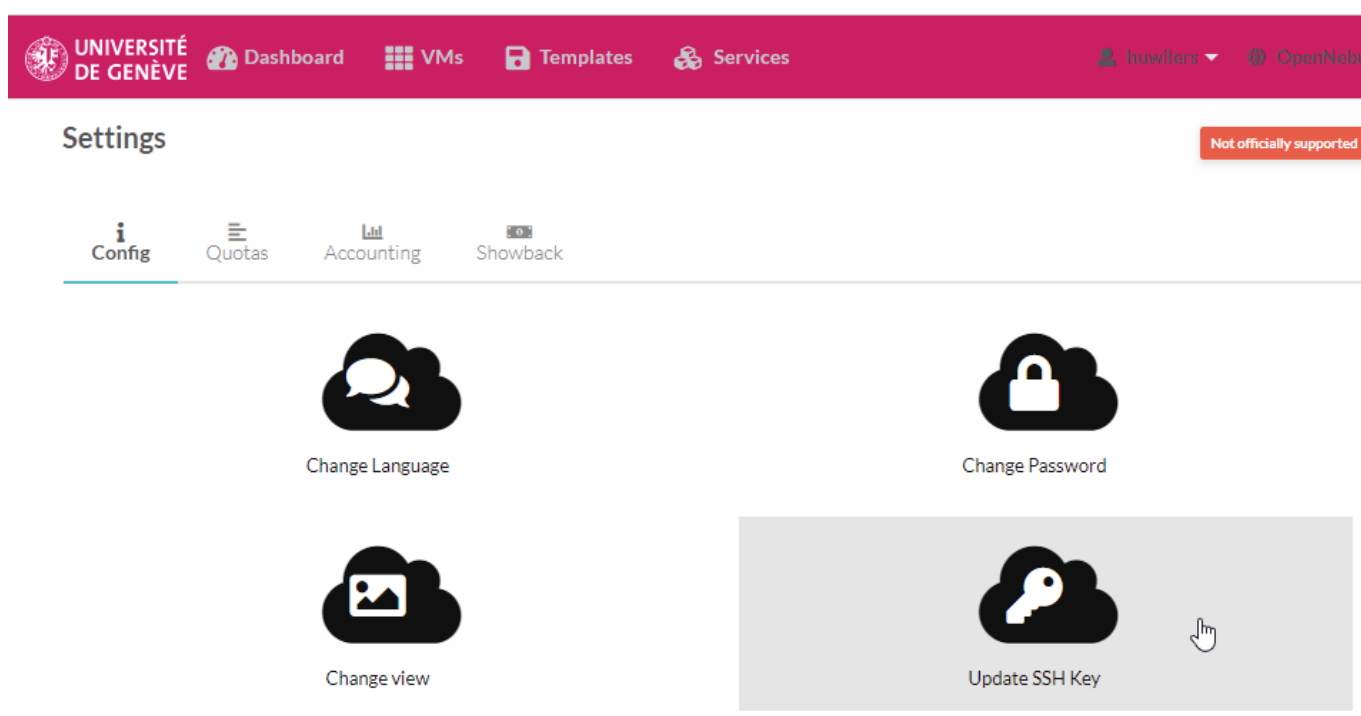

Login

After the first login et before deploying a virtual machine, you need to configure your SSH Key

Go to Settings

Click on Update SSH Key :

Enter you SSH public key :

Update your public SSH key!

You will be able to access your Virtual Machines without password

`ssh-rsa`

Update SSH Key
