The resize is not available when the vm is ON

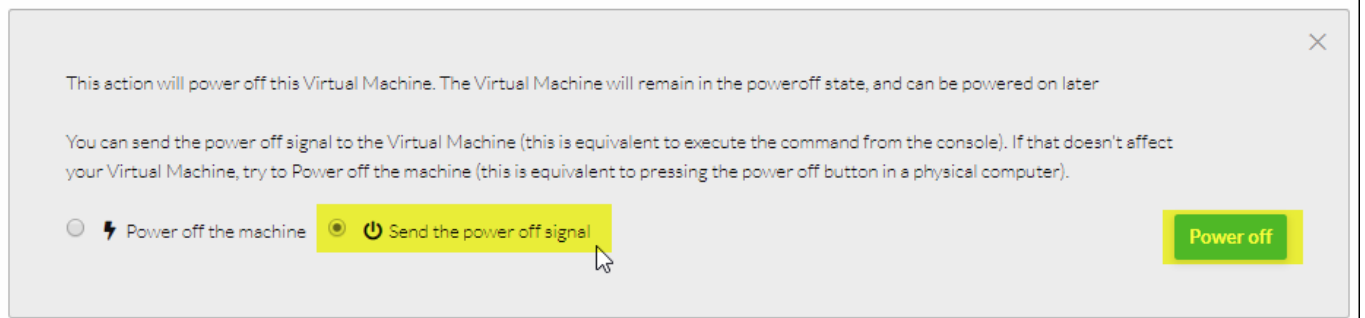

Before changing hardware configuration you need to turn of the VM

You can turn off by using SSH or the web interface :

Turn off option :

- “Send the power off signal” will send a signal to the VM to do a proper shutdown
- “Power off the machine” will power off the machine similar than removing the computer power. This should be use only if the “Send the power off signal” don't work.

The status is now powering off :

Press the refresh button to refresh the status until the status is OFF :

Go to the Storage tab And click on the resize button ()
