

# Action pré-maintenance

## Maintenance

### Update slurm1

Désactiver les services slurm:

```
(baobab) - [root@slurm1 ~]# systemctl disable slurmdbd  
(baobab) - [root@slurm1 ~]# systemctl disable slurmctld
```

Stopper les services slurm:

```
(baobab) - [root@slurm1 ~]# systemctl stop slurmctld  
(baobab) - [root@slurm1 ~]# systemctl stop slurmdbd
```

Update Yum:

```
(baobab) - [root@slurm1 ~]# yum versionlock delete *slurm*  
(baobab) - [root@slurm1 ~]# yum update
```

Si tout est OK, rallumer slurmdbd pour lancer la conversion de la base:

```
(baobab) - [root@slurm1 ~]# tail -f /var/log/slurm/slurmdbd.log  
(baobab) - [root@slurm1 ~]# systemctl start slurmdbd
```
