Documentation

1. HPC
2. nasac (NAS académique)
3. IaaS (Open Nebula)

For editors (click to reveal)

1. Check the DokuWiki syntax
2. You can try it out in the playground playground
3. Please generate you page (and links to those page) whithin your namespace
4. Remember that the Wiki is free to access by anyone
5. Remember to always sanitize :
   1. your hands (because of covid-19), and
   2. your data from any sensitive information (password, identities, etc.)
6. If you are working with pictures
   1. If an image is in your clipboard (screenshot), you can paste it in edit mode (see imgpaste plugin for more details.
   2. If it's in a file, you have to upload it using the `media manager`
7. It is recommended to use the DokuWiki syntax. However, if you already have documentation in markdown and you cannot "translate" to DokuWiki syntax, then you can try to paste it between `<markdown>` and `</markdown>` elements.
