2025/11/29 12:29 1/1 Metadata upgrade

Metadata upgrade

Description

This job migrates the archives to the latest version of metadata. For each archive, the new version of the archive is created by upgrading the metadata.

Prerequistes

- The replication process must be executed.
- The replication check must be executed.
- The clean process must be executed.

The metadata upgrade is only applicable on archives which have the ingest objects cleaned.
